Mr. P. Joseph Lehman, Jr., P.E.  
P. Joseph Lehman, Inc., Consulting Engineers  
Olde Farm Office Center  
Hollidaysburg, PA 16648

Dear Joe,

With my new position working for the Lieutenant Governor, I deal with local governments and some of those projects are bridge projects, which has given me a reason to reflect upon the projects we worked on jointly. As you well know our relationship crosses the century boundary. I recall first meeting you and Marty in 1992, which was the first year of my first term as a Cameron County Commissioner. The project as you may recall was replacement of the Castle Garden Bridge over the Driftwood branch of the Sinnemahoning River. It was a difficult project because of the many environmental and historical issues. Your firm handled them with ease and professionalism, even as state agencies erected roadblocks.

After that experience the Board of Commissioners recognized that we could entrust any project that we had to you and your employees without worries. Some of the services that P. Joseph Lehman, Inc. has provided Cameron County, as our Engineer of record, include bridge inspections and oversight of necessary repairs, bridge replacements and engineering services for the construction and renovation of the century old courthouse. Your firm also provides bridge inspection services for all of the townships in the county.

Now after more than a decade and a half of public service, I realize how important and unique your firm is in its approach to customer service. As a former Commissioner, I find this attribute is almost as important as quality of work. You and your co-workers have always been responsive to the requests of the Board. Your customer service is unmatched.

Please let me know if I am ever able to assist you in any endeavor or that you may undertake.

Sincerely,

Anthony C. Moscato, Commissioner emeritus  
County of Cameron
