FOR IMMEDIATE RELEASE
11am, May 6, 2011

P. JOSEPH LEHMAN, Inc., Consulting Engineers is very pleased to announce the hiring of Mr. David E. Field, Professional Geologist. Mr. Field joins the growing team at Lehman Engineers as Senior Geologist/Geologic Services Director. As a licensed Professional Geologist in Pennsylvania and California, Mr. Field brings over thirty five (35) years of experience in geology and hydrogeology. His extensive experience includes involvement with development of Marcellus Shale business and operational procedures. In addition, David worked alongside the PA DEP in developing protocols for mitigating first-of-its-kind spills to be overseen by PA DEP and developed field methods to screen soils for chlorides. He actively manages PA Title 25, Chapter 245 underground storage tank projects, including site characterization and remediation implementation. Mr. Field also has developed and drilled oil and gas exploration programs and completions on company-owned rigs, including sand fractures, acid floods, swabbing operations, and steam injection.
