LEHMAN ENGINEERS HOSTS SUMMER INTERNS

Hollidaysburg, Pennsylvania - P. JOSEPH LEHMAN, Inc., Consulting Engineers hosted two summer interns. Ben Hiltz, from Penn State University, spent the summer working in the Roadway Department, and Jonathan Graffius, from St. Francis University, spent his summer with the Environmental Remediation Department.

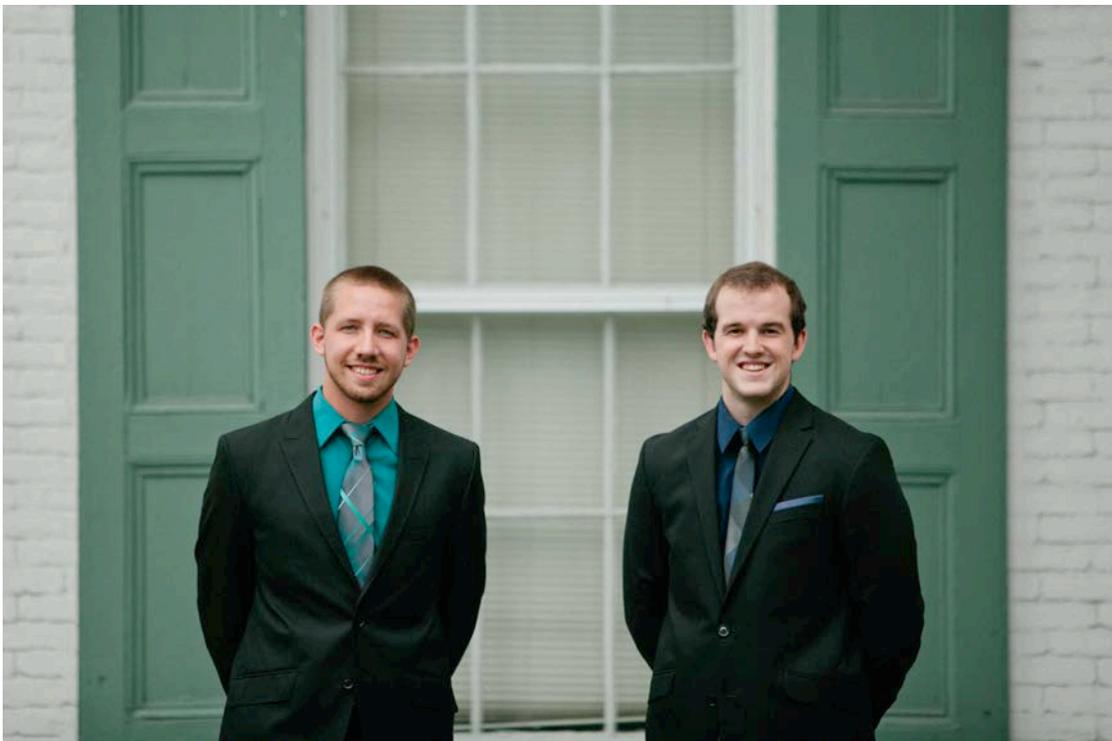

Ben, a native of Johnstown, spent the summer exploring all aspects of the design process for multiple transportation projects. He learned about everything that goes into a design plan and was exposed to things he will use his entire career as an aspiring civil engineer. During his time working at P. Joseph Lehman, Inc., Ben improved his computer skills, gained knowledge of the aspects of civil engineering, acquired "real world" experience related to his course work, and experienced what it is like working in an engineering firm. Ben is returning to Penn State University this fall to complete his degree.

Jonathan, a native of Altoona, spent his summer learning about what goes into environmental remediation projects at P. Joseph

Lehman, Inc. Jonathan learned new groundwater and soil sampling techniques and participated in system checks on environmental remediation systems, which treat contaminated groundwater with hydrocarbons. Jonathan also spent time as an emergency responder, learning how to clean up transformer spills and the proper way to report the information back to the client. Jonathan will be returning to St. Francis this fall to complete his degree.

P. Joseph Lehman, Inc., Consulting Engineers is made up of a growing team of highly-skilled professionals and experienced specialists in transportation design, structural engineering, site development, surveying, environmental science, environmental characterization and remediation, geology and construction services. Lehman Engineers currently maintains offices in Hollidaysburg, Bedford and Pittsburgh, PA.
