Lehman Engineers Hosts Hollidaysburg Area High School Students for Job Shadowing

On Tuesday, December 16th, Lehman Engineers hosted Collin Terchanik and Kirsten Eaton from the Hollidaysburg Area High School. Collin came seeking some more direction in a career in Environmental Engineering, while Kirsten came to get more of an inside look at the entire engineering profession. Scott Klingenberg, Environmental Services Director, explained just what goes into preserving wetlands and surrounding environments during engineering projects. Bob Bryant, P.E., Ryan Granville, P.E. and Adam Shriver discussed the phases of Highway Engineering projects. They learned the process from PennDOT announcing the project to final completion. James Prohonic, P.G., Senior Client Representative, also had a chance to talk to them about securing private work for the Geological Services Department at Lehman's. Kristen and Collin said they learned a lot about the career path of engineering and how many different types of engineers there

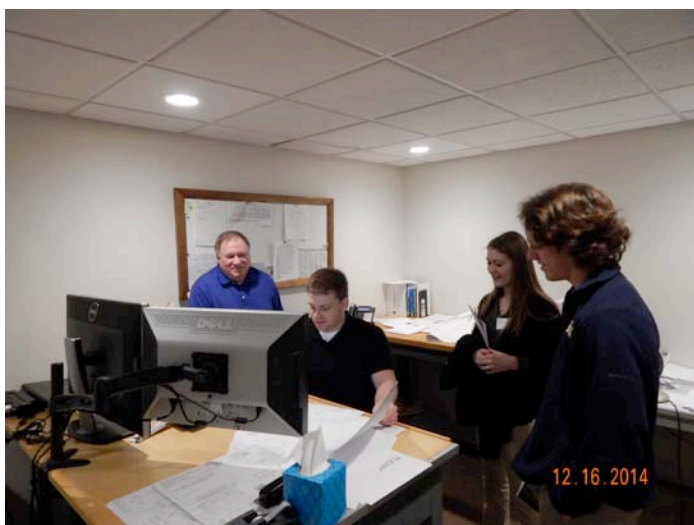

are. They also found it interesting to learn that each project is a team effort, dealing with many departments throughout Lehman's. They explained that each department at Lehman's is responsible for a certain section of the project but they all work together to achieve the end objectives.
