

## **COVID-19 RESPONSE**

As we monitor and learn more about the threat of Coronavirus in our communities, P. JOSEPH LEHMAN, Inc., Consulting Engineers wants to be as proactive as possible regarding what we are planning and doing as a firm to protect our employees and support our clients. The safety and health of our clients and employees are of the utmost importance to us.

To ensure transparency and effective communication, we have formed an internal task force who continues to meet on a regular basis to monitor the situation closely as it continues to evolve and give regular updates to clients and employees. Our staff is working completely remotely, operating in a telework/virtual environment. Project Managers are still reachable via telephone. The main office telephone number, 814-695-7500, is fully operational and forwarded to Ms. Sherrie Ayers, Office Manager. Sherrie is answering all calls, forwarding all messages, and directing calls to cellular numbers when needed. All employees are able to access email communication as well.

Externally, P. JOSEPH LEHMAN, Inc., Consulting Engineers has reached out to the communities we serve to determine any needs or opportunities to support emergency management departments. We will continue to stand with our clients, employees, and communities as we address the evolving challenges being presented.

Wishing you continued health and safety,

P. Joseph Lehman, Jr., P.E.  
President
